

WHO'S GOING WHERE?

ALEXANDREAS, Marina	Lunex University - Physiotherapy
BERNARDY, Edy	Hofstra University, New York - Economics
CARRICO, Dillon	Manchester - Biochemistry
COSTA DE SOUSA, Francisco	University in Portugal
DANNENBERG Richard	Aberystwyth University - Creative Arts
GARAH-Nielsen Pascal	Gap year
GIBBONS, Evie	University of Creative Arts - Digital Film and Screen Arts
HOGAN, Orla	Court Theatre Training Company - Acting
HORAN, Alex	Camberwell University of the Arts - Foundation Diploma in Art and Design
INGVASON, Aki Eli	Winchester - Geography
MURASHKO, Mykola	Cambridge - Architecture
OLUFSEN, Emilie	Oxford University - Mathematics
RADCLIFFE Eleanor	Durham - History
RADCLIFFE Matthew	Sheffield - Engineering
SARDELLI, Martina	St. Andrew's - Biochemistry
SHARMA, Tanya	UCL - Medicine
TOPAZ, Jonathan	Oxford University - History
TROELSTRA, Veerle	UCL - Environmental Geoscience
UTTING, Ethan	Bath - Aerospace Engineering
VAUGHAN, Harry	Liverpool University - Business Management
WANG JIAYI (Jolina)	UCL - Mathematics

MY TIME AT ST GEORGE'S

I will be going to the UK to study History at Oxford, and am most excited to meet new and interesting people, to discover the city and the rest of the UK. What made St George's unique and ideal for me was the fact that our teachers genuinely cared for and supported us throughout secondary and Sixth Form, and how kind and friendly the students are. One of my highlights was going to Frankfurt in 2018 as part of the Generation Euro Student Award ceremony and meeting ECB President Mario Draghi. To the year 13s, I wish you an eventful last year of high school, every success in exams and university applications, and best of luck in whatever lies ahead.

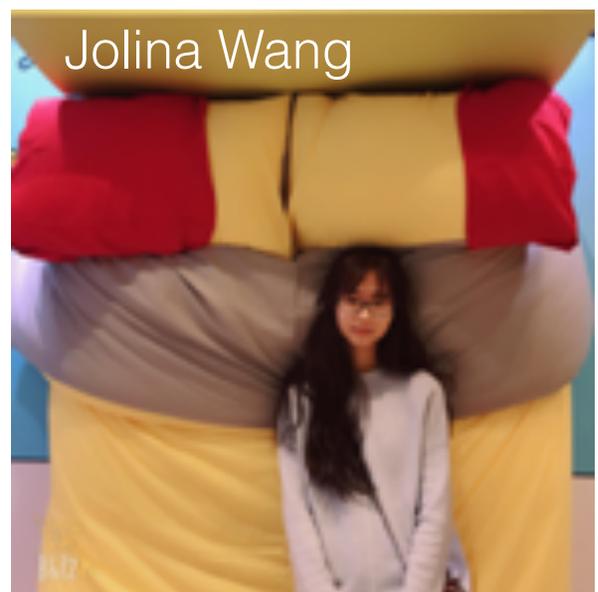

"Balance"

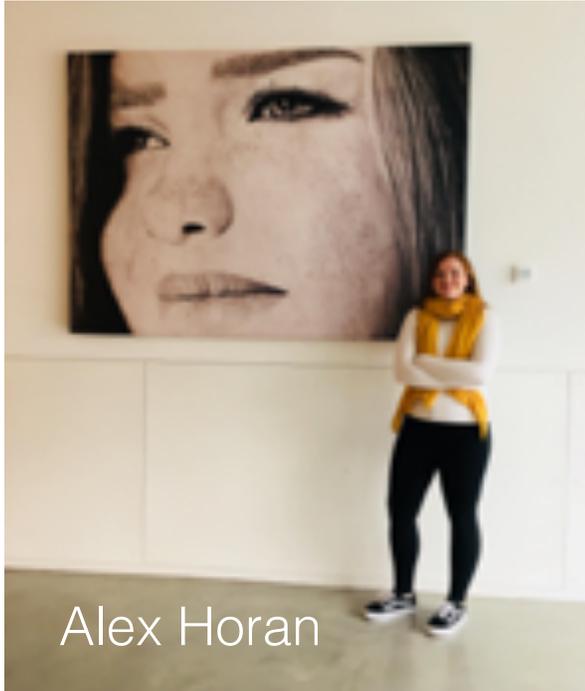

Bath, Aerospace engineering, I'm really looking forward to finally studying the course that I have wanted to pursue for a long time. I can't wait to join the societies at uni and start the second chapter of my life. St George's has given me many of the tools to do this. My favourite memory of my time here will always be the fantastic trips we went on as a year and the many adventures we all had together. I hope the future Y13s will have the same adventures we have had in our final year and wish them all the best of luck.

"Ciaga"

I'm going to study mathematics at UCL. I'm looking forward to studying maths at university and meeting people in a new city. I really enjoyed my time at St George's for these two years and people here are always willing to help others. I wish all the best to everyone for the exams this summer.

Alex Horan

I'm going to UAL (University Arts London) in Camberwell for a foundation diploma in Art and Design. I am most looking forward to meeting a wide variety of new people and seeing how I adapt to living on my own. The thing I loved most about St George's is the relationship I have built up with my close friends and teachers over the years, but I have also loved the work I have done in primary and the relationships I have built up there. For the future year 13s I wish that they discover what they love to do and enjoy the amazing journey they have ahead of them.

University of Winchester
Geography

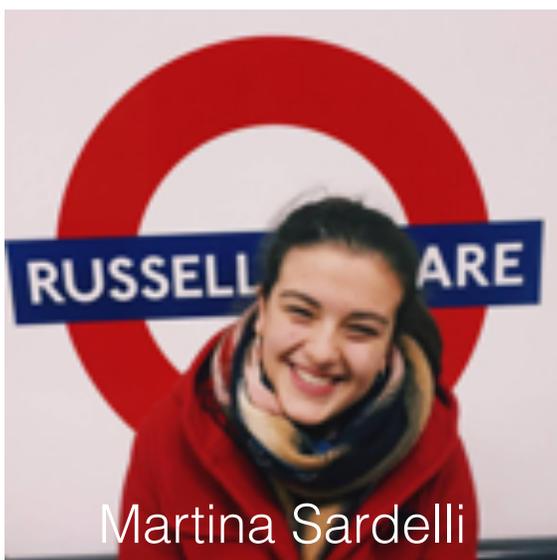

I am most excited to study a course that I truly love and enjoy. Living independently in a new country is as exiting.

The close community of St George's is such a unique and wonderful experience. The teachers are always there to help and truly care about their students.

I hope that the future Year 13 will enjoy their final year as much as I did and good luck.

Aki Ingvason

Martina Sardelli

I'm going to St Andrews to study Biochemistry, I'm incredibly psyched to meet new people, try new things and live in a new country!

St George's has really enriched me as a person both on a social and on an academic plane and I'm really happy to have made so many new friends with whom I've shared some amazing moments.

I wish for future yr 13s to have the most fun possible in their last year and take everything with a pinch of salt. In my opinion, the final year is about compromise and balance, not constant perfection.

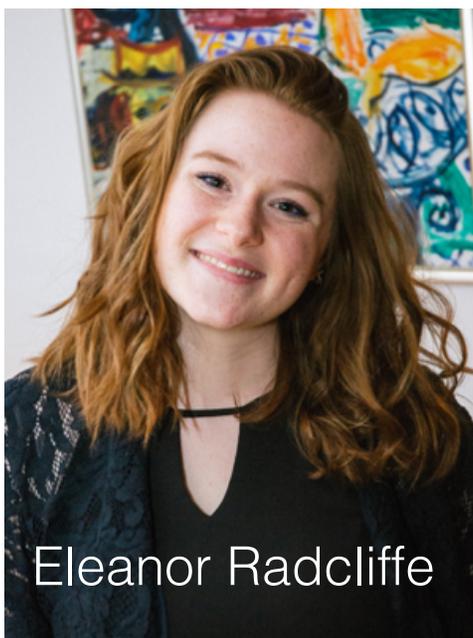

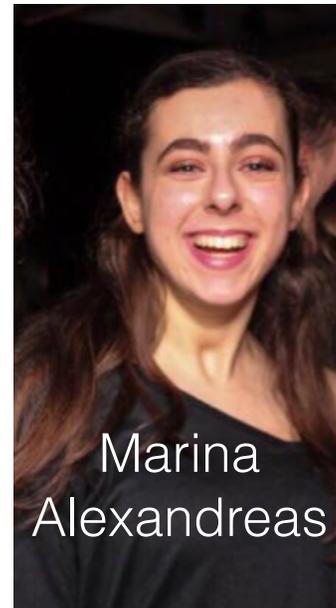

Oxford

Course: Mathematics

I'm most excited to get into another environment where there is an intense academic focus, and I will be able to concentrate solely on my one passion. But also meeting new people and becoming more independent. Having been here for 13 years I've always felt that the school has been much like a family. We get an unparalleled amount of attention from teachers which I really think has contributed to my positive experience. I hope for the future year 13s that they succeed in all they wish to do both academically and personally

I'm going to be studying Physiotherapy at LUNEX next year and I can't wait to finally start my course.
I had an amazing time the past 7 years at St George's, from the support from teachers to the jokes with my friends, and I wish the new year 13s the best of luck with their applications and exams.

I will be studying History at Durham University. Even though I've only been at St George's for 2 years, I feel like I've managed to achieve so much more than I ever could have imagined. The opportunities I've been able to take part in are incredible. My favourite has to be the COBIS Debating World Championships in Malaga in 2017. The confidence and all-round knowledge that I gained here has definitely shaped my academic speaking. Coming from a huge Luxembourgish high school, the small and tight-knit community at St George's was the perfect environment for my A Level years. The immense support from teachers is something I will miss and I hope next year's Year 13 don't take it for granted and savour every moment of their last year of high school.

Orla Hogan

I'm going to be attending a 2 year intensive BA course in Acting at The Court Theatre Training Company in London. I'm really excited to be surrounded by people who share my passion for theatre. St George's has given me so much throughout the years: I've made friends for life, and the happy memories that come with them, but also the school has molded me to be who I am. I hope that the following Year 13's follow their aspirations, and will be happy with the direction of the next step in their lives.

"Love the art in yourself and not yourself in the art" - Konstantin Stanislavski

I will hopefully be studying medicine at UCL next year and look forward to being in the vibrant city of London and meeting new people. However, I am also very grateful for the friendships I have formed at St George's and the experiences I've been able to have here. I hope the future year 13s will enjoy being at the top of the school and make the most of their last year.

Tanya Sharma

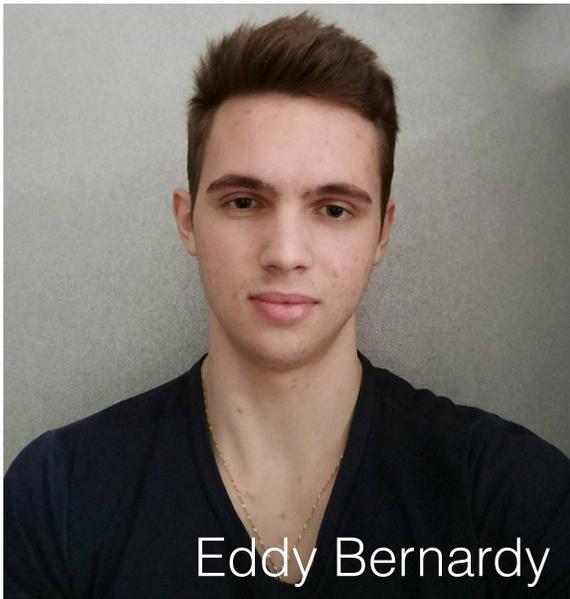

Evie

I will be going to University for the Creative Arts in Farnham doing the BA course in Digital Film & Screen Arts. I'm most excited to **meet** like-minded people who have the same interests, creativity, hobbies and likes as me. I really look forward to living close to the centre of London where there are so many artistic opportunities and events to go to. I'm also really excited to start my course in terms of learning lots more about the area of study that I have chosen and doing lots of practical artistic creative work/getting involved in artistic projects during the course. I'm looking forward to discovering more about myself, exploring different things and finding out what brings me the most fulfillment in life.

Evie Gibbons

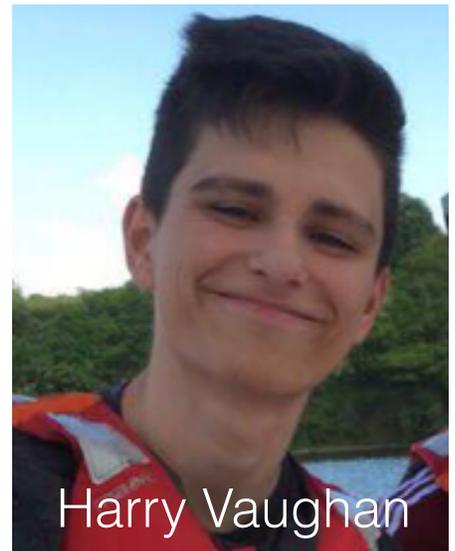

Eddy Bernardy

I'll be majoring in Economics with a minor in History as part of the Honors College at Hofstra University, which is situated about 20 miles from New York City. I eagerly anticipate living on a different continent (something which I've never done before) and meeting new people of various backgrounds and cultures. Since I was 4 years old I have been attending St George's, and although the school has grown substantially over the years, it has maintained its warm and welcoming "family ambience" where everybody knows each other. What's nice about it is that you really get a chance to build meaningful friendships with other students, and in some cases, with teachers too. As well as that, there is always a member of staff who will do their utmost to support you academically and in any way you might need,

like for example, Mr Shaw, who helped me throughout the whole US university application process, although he had never been through it previously. For the succeeding Year 13 class, I wish them luck with their university offers, as well as their A2 exams, and hopefully they end up studying in the places that they want most.

Liverpool, Business Management,
Over the 14 years of my time at St George's, I have had some great experiences such as school trips to Amsterdam, London and Avignon, as well as some not so great experiences, such as exams and worst of all, missing golden time. Overall, I have thoroughly enjoyed my time here, though I am excited to start a new chapter in life.

Harry Vaughan

Dillon Carrico

I am going to the University of Manchester and I'll be studying Biochemistry.

During my time at St George's what I enjoyed the most has to be the banter between teachers and students, **which** can be a rare thing to come across in some schools

I'm going to UCL to study Environmental Geoscience. What I'm most looking forward to about going off to university is making another start at my life with new routines, new activities and meeting more people of different nationalities. What I appreciate about St George's is how well you get to know people throughout the years. Despite St Georges' tendency for people to come and go, I found that this has brought me even closer to those who did stay and I'm very grateful for this. Therefore what I wish for future year 13s is to make the most of these last few years, rather than waiting for the end of it all.

Veerle Troelstra

Matthew Radcliffe

Im going to the University of Sheffield to study engineering. What I'm most looking forward to is the independant aspect of university and meeting new people. Because I haven't been at St George's for a very long time, I've appreciated how easy it is to get to know people well within such a short time period.

I will be going to Portugal to attend a university there which is yet to be decided, and so is the course I will be doing, but it will likely involve computer science and business management. What I enjoyed the most about St George's was the various school trips we got to go on, in some schools you would not get this opportunity, I had a lot of fun while doing the activities and really enjoyed the time I spent with my friends.

Francisco Sousa

Mykola Murashko

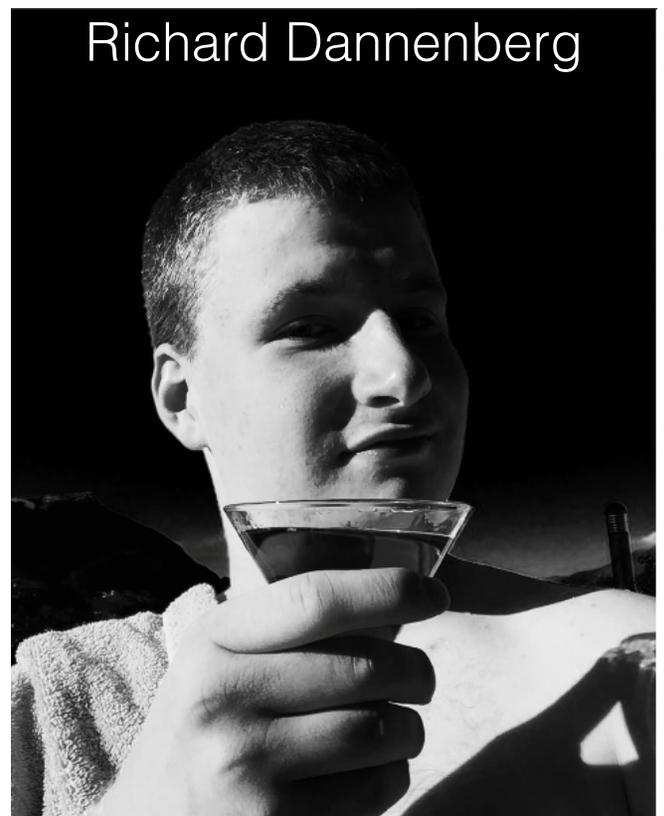

I am Mykola and I'll hopefully be going to the University of Cambridge to read Architecture next year. This has been a dream of mine for the better part of the last 10 years, and St George's helped me form that dream into a clear and defined goal, and now a reality. My 6 years in St George's shaped me into the guy I am today, and for that I owe the school a sincere thank you – from broadening my horizons to nurturing my ambitions, I couldn't have accomplished as much as I have without the support the school has given me.

Aberystwyth University
Creative Arts

I'm most excited to develop my writing, acting and directing skills, continuing to learn to play the piano and to be in an environment full of people with diverse creative interests, and hopefully one day publishing a play, script or a book

I've enjoyed most **laying** the groundwork for my creativity, this is the first school that's properly nurtured me in that field, and the highlight has been acting with my fellow Drama students live on stage and seeing my Media coursework played out on the big screen in the Auditorium.

To future Year 13s: Enjoy yourself (and revise).

PROM

This year's prom celebration is **will** be held in a lovely room with a beautiful outdoor section in the Royal Hotel in Luxembourg, the same room that we booked last year. We have worked closely with the Royal to make sure that this years prom is a success and a night to remember. The evening will start off with some bubbles and canapés, and then we'll all have time for photos until dinner is served. Throughout the evening music will be played, along with a slideshow of photos from our graduated students on a large screen projector. Also towards the end there will be a few speeches thanking everyone who contributed to the fundraising for the event. We have asked for a dance floor in the center of the room this year, so at the end of dinner students and teachers can dance as they wish. We want all the decoration to be a surprise for everyone but I can assure you it will be a lovely atmosphere and a night worth remembering. We can't wait!

GRADUATION

Our graduation ceremony this year will be held in the Zinnen Auditorium at school. The evening will begin at 18:00 outside of the auditorium where Champagne and canapés will be served by our wonderful year 10 helpers. At 18:30 we will enter the auditorium and the speeches will begin by both staff and students, and the awards will be given out. There will be plenty of time for photos at the end of the ceremony as we want everyone to have many photos to cherish. This will be a wonderful celebratory evening for our year 13 classes and one we wish everyone to enjoy!

SOME EVENTS THROUGHOUT THE YEAR

PROVENCE TRIP

CHRISTMAS FAYRE

EASTER DISCO

AMIS TRIP TO SINGAPORE

THE ECB'S GENERATION EURO STUDENT AWARD

YEAR 13 ARTWORK
